[COMPANY PROFILE]

PT Mitra inti Solusindo

Your Trusted and Reputable Strategic Partner

PT MITRA INTI SOLUSINDO

Trusted and reputable strategic partner in information system solution

VALUE

We consider Information Technology as a valuable tool that enables your business to grow.

In today's business, there is no doubt that Information Technology is essential and very critical for companies to survive and win in a more challenging market.

Leading corporations are using Information Technology not only to administer their operation, but also as a strategic tool to compete and to grow! Implementing the "Right IT Solution" becomes a critical issue.

We are committed to provide effective and valuable Solutions and Services to your business.

BACKGROUND

PT. Mitra Inti Solusindo was founded in 1998, specializes in delivering business solutions in Manufacturing, Distribution, Service, and Multi Finance industries. One of our strong points is a vast expertise and experience in Planning, Designing, Developing, Implementing, and Supporting integrated business solutions.

Repeated and referral businesses have attested a high level of customer satisfaction and respect for our services, which determined our achievement and growth.

- To enhance shareholder values.
- To afford our employees the opportunity to realize their professional and personal goals.

BUSINESS FOCUS

- Enterprise Resource Planning (ERP)
- Business to Business (B2B)
- Custom Application Development
 - .Net
 - AS/400
- Multi Finance
- Professional Services

PROFESSIONAL SERVICE

Having constructed and implemented numerous business solutions, and worked with many local and foreign organizations, we understand that ‘computerization’ is not just an act of purchasing IT equipments and world-class application packages.

*Competency, Dedication,
and the Spirit of
Teamwork are our Service
Foundation*

It is a Process initiated with Business Analysis.

The system should fit to the business process in order to increase the productivity, and should be able to deliver the required information to support the organization in achieving business objectives. Hence, all business requirements must be analyzed and defined at the beginning of implementation project.

BUSINESS APPROACH

We believe that clients are very knowledgeable about their businesses, and we have to perform thorough analysis in order to deliver the appropriate solution. Consequently, a team consisting of our consultants and clients’ key personnel should work together to successfully examine business processes and future organization objectives. The team will identify the key business requirements, business objectives to be achieved, and the opportunities for business improvement, through the conception of best-fit solution for the organization.

The key success factor in information system implementation is highly depends on the ability to effectively integrate Information Technology/ System, Business Process, and People who perform the process and associate these three components to the Business Strategy of the organization.

Provided with experience and expertise in the form of proficiency in local business practices and deep industry-knowledge accumulated over the years, we are confident to serve you in the following competencies:

- IT Consulting Services on Needs (Requirements) Identification and IT Strategic Plan
- Customization and Implementation of Business Application Package
- Development of Business Application Software to meet the 'local' needs
- Professional On-Site Support

Equipped with proven methodology, strong project management skills, commitment to exceeding your expectation, and willingness to work closely with you, we are convinced that our services can benefit your organization.

Together in a team work, we ensure the solution delivery on time and within budget.

PEOPLE

Our team consists of professionals with expertise in industry knowledge, business strategy, leading business application, and information technology. While the technical team has massive experience with

Client/Server Technologies and Internet-based Computing, employing prominent Microsoft and IBM AS/400 technologies.

- 6 professionals over 10 years
- 10 professionals over 5 years
- 10 professionals 1-5 years

STRATEGIC PARTNER

The satisfaction and the success of our clients signify our success.

We take pride in the facts that a lot of our long-standing satisfied clients still make use of our services and products we have delivered in the MIS's early years.

Today, with a growing list of satisfied clients, MIS has secured its position to be a trusted strategic IT partner.
